Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1, 3 and 5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Tsao (Us 5,702,035) discloses a slender tubular container with two ends 62,63, 72,73 with a seal 66 separating a liquid chamber and an air chamber. The housing has notch 65 for opening the housing. Although it is not clear if the notch was scored, it would have been obvious to do so since they are equivalent structural feature. Also, it would have been obvious to provide a sealed end 83 on the absorbing element 62,72 to prevent premature leakage. With regard to claim 5, when the liquid is not in the housing, it contains two air chambers.

Allowable Subject Matter

3. Claims 2 and 4 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
